PROFILE

Learning & Development leader with 4+ years building and running corporate learning functions from zero across brokerage, banking, EdTech and FMCG. Owns learning portfolios end to end - organisational needs diagnostics, leadership development, onboarding, assessment and certification, content standards and LMS governance - and holds them to business outcomes rather than corporate L&D checklists. Comfortable with ambiguity: turns loosely defined stakeholder requests into defined goals, delivery plans and measurable results. Practical adopter of AI in learning: produces AI-assisted e-learning in production and comes from an AI-driven EdTech product background. Professional fluency in English, written and verbal.
